

After 5 cycles or about 2 minutes of CPR, use the AED.

Put the AED next to the victim and follow commands:

- Turn on the AED

- Attach *child* pads if available; use a child key or switch if available
- Use adult pads if child pads are not available

- Be sure that no one is touching the victim and allow the AED to check the heart rhythm (or push ANALYZE button if needed)

- Be sure that no one is touching the victim and deliver a shock (follow AED prompts)
- Start CPR immediately (beginning with chest compressions) after shock delivery
